Chain Stones: every stone

All six pieces at levels 1 to 5, facing up, with their spikes listed as top · right · bottom · left. The rating out of 100 measures single fights. Each stone is put next to every stone an opponent can have (every piece, level and direction, from every side), once as the stone that is placed and once as the stone that is already there. Each case scores the points won minus the points lost in that one move, so taking a king counts 3. The average is scaled so that the strongest stone scores 100 and the weakest 1. Chains, the rest of the board and the choice of where to play are left out. Stones with 5 spikes on every side (Castle Carl at levels 4 and 5, Her Majesty Mayhem at 3 to 5, Old King Coal at 5) fight the same way and share the top score.
