Chain Stones: every stone

The six chess pieces at levels 1 to 5, facing up, with their spikes listed as top · right · bottom · left. The rating out of 100 counts spikes: every spike is worth 5 points, so a stone with the maximum of 5 spikes on all four sides (20 spikes) scores 100. Old King Coal has no spikes but golden shields: every spike that touches him breaks and he is never taken. The rating counts spikes only, not the powers of the rare stones.

Rare stones

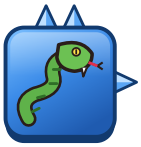

Each rare stone belongs to one opponent, who brings it in the middle and late matches and drops it half the time when you win. They grow by their own table instead of one spike per side.

Serpent rare stone

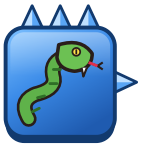

Poisons every stone its spikes hit.
