Rook-like: every stone

The six chess pieces at levels 1 to 5, facing up, with their spikes listed as top · right · bottom · left. The rating out of 100 counts spikes: every spike is worth 5 points, so a stone with the maximum of 5 spikes on all four sides (20 spikes) scores 100. King Kobe has no spikes but golden shields: every spike that touches him breaks and he is never taken. The rating counts spikes only, not the powers of the rare stones.

Rare stones

Each rare stone belongs to one opponent, who always plays it and may offer it when you win. They grow by their own table instead of one spike per side.

Venom Veronica rare stone

Poisons every stone her spikes hit.
